

The Wheel Of Change

Transformation is change that is profound, radical, and sustainable, change that fundamentally and indelibly alters the very nature of something.

The Wheel of Change is a simple yet powerful transformative model for those who seek to create change—whether for individuals, organizations, or societies.

The Wheel of Change is a systemic approach to change. In order to create the conditions for transformation, we must always attend to:

Hearts and Minds

All that goes on inside human beings, our motivations, beliefs, feelings, perceptions, etc.

Behavior

What people actually do, our words and actions.

Structure

Our external environment, the social reality and structures in which we operate.
